

Aseem Shrey

Infrastructure Security Engineer @ Scale AI | 7+ YoE in Security Engineering | Prev - Rippling, Yahoo, Blinkit & Gojek | Privacy Engg @ CMU
San Francisco, California (US)

[@aseemshrey](#) [LuD1161](#) [HackingSimplifiedAS](#) [Aseem Shrey](#) [aseem-shrey](#)

SUMMARY

7+ years in cloud security, AppSec, and security automation at Scale AI, Rippling, Yahoo, GoJek, and Blinkit. Building contextual cloud security and AI-powered SOC triage at Scale AI. Built [AgentJail](#) for AI agent guardrails. Founded [ShipSec.ai](#), an AI security automation platform. Active CTF player and bug bounty hunter. Acknowledged by US DoD, Google, GM, IBM.

PROJECTS (2)

AgentJail

Jan 2026 - Current

<https://agentjail.io>

AI Security Golang Linux Namespaces

Policy-driven guardrails for AI agents. Lightweight Linux sandboxes with seccomp, network allowlisting, and cgroup isolation.

- Linux sandboxes using pivot_root, seccomp, and cgroup v2 for safe execution of untrusted code.
- Network allowlisting via HTTP CONNECT proxy with DNS rebinding protection and phantom credential injection.

Honest Privacy Policies

Jan 2025 - Current

<https://honestprivacypolicies.org>

Privacy AI NLP Consumer Rights

AI-powered privacy policy analyzer. Reads 525K+ words of fine print and grades companies A-F in plain English.

- Grades corporate privacy policies A-F, translating legalese into plain English.
- Analyzed 525K+ words of fine print across major tech companies to surface data collection practices.

WORK EXPERIENCE (7)

Infrastructure Security Engineer at [Scale AI](#)

Jun 2026 - Current

📍 San Francisco, California

- Contextual security infrastructure protecting 100s of cloud accounts and trillions of assets.
- Supporting automated AI-context triage SOC for security alert processing and response.

Founder & CEO at [ShipSecAI](#)

May 2025 - Mar 2026

📍 San Francisco Bay Area

- Built OSS no-code security automation platform from 0 to 1. Led team of 4. Pitched 50+ investors, secured Draper University and Antler EIR spots.
- 100+ customer interviews for PMF validation. Developed GTM strategy and community presence.

Founder & Security Consultant at [SecureMyOrg](#)

Jan 2024 - Current

📍 Remote

- 15+ clients across US, UK, Singapore, India. VAPT, cloud security audits, and security engineering.
- 95%+ client satisfaction. Coordinated freelance engineers to scale delivery.

Security Engineer (Contractor) at [Yahoo](#)

Aug 2023 - Dec 2023

📍 Remote, US

- **SEA Team:** Automated critical migrations for on-prem security deployments.

Security Engineer at [Rippling](#)

Feb 2022 - Sep 2023

📍 Bangalore, India

- **InfraSec:** Automated Vulnerability Management System (VMS) and security infrastructure processes.
- **Assurance:** Built product security automation and automated DAST.
- **ProdSec:** Threat modelling and code reviews for product releases.

Senior Information Security Engineer at [GoJek](#)

Feb 2021 - Feb 2022

📍 Bangalore, India

- **Compliance As Code:** CIS Benchmark auto-remediation in GCP using Cloud Run.
- **Red Teaming:** Escalated privileges to admin access across almost all GoJek infrastructure.
- **Pentesting:** Web API and Android penetration testing for feature releases.

Security Engineer at [Blinkit \(formerly Grofers \)](#)

Apr 2019 - Jan 2021

📍 Gurgaon, India

- **G-Shield Security Bot:** GitHub bot scanning PRs for secrets, code smells, vulnerable images, and sensitive mounts.
- **DNS-As-Code:** Terraform pipeline for Cloudflare/Route53 DNS with failover switching.
- **Temp DB Credentials:** Vault + GitHub integration for team-based temporary database credentials.

EDUCATION (2)

Master's degree Privacy Engineering at Carnegie Mellon University

Aug 2024 - Dec 2025

Grade: 3.77/4

B Tech. Information Technology at IIT Allahabad

Jul 2015 - May 2019

Grade: 7.95

PUBLICATIONS

AWARDS (5)

Discovered Critical Data Leak in India's GST Portal - 2024 at Government of India

HackIM CTF - 1st (India), 8th (World Rank) - 2018 at NullCon - Walmart & VirtualBox

Found IDOR Bug in Digilocker (Gol Initiative) - Hall of Fame - 2017 at Govt of India

Reported bugs to US DoD, American Airlines, Google, GM, IBM, MakeMyTrip, Myntra, Zoho, Sony etc

CTF Competition Achievements: 5th place CSAW Finals, 1st place Terminal Tragedy (NIT Trichy), Top 20 DRDO CTF - 2017 at Multiple CTF Competitions

SKILLS

Cloud & Product Security

Advanced

- AWS
- GCP
- Kubernetes
- Terraform
- IAM
- Threat Modeling
- Security Architecture

AppSec & Security

Engineering

Advanced

- SAST/DAST
- Web/API Pentesting
- Vulnerability Management
- CI/CD Security
- DevSecOps

Programming

Advanced

- Python
- Golang
- Bash
- Rust
